Important notes for costs

Tecnológico de Monterrey generates its final costs on a semester basis, so the prices here presented are close estimates of the final price. Please ask for current prices when you apply for admission or wait to receive the final list of prices on your acceptance package. In either case the differences between these estimated costs and the final ones should be minimal. The exchange rate considered for the prices presented in US Dollars was 17.00 pesos per dollar.

All prices given in US Dollars are for reference purposes only and do not represent the actual cost since variations on the exchange rate happen every day. Tecnológico de Monterrey will only charge tuition and any other fees or services in Mexican pesos, even though the payment can be made in US Dollars at the exchange rate of the day of payment.

Important: Paying by an international transfer of money can only be made in US Dollars and not in pesos. Mexican pesos can only be paid once you are in Mexico.

Apartment costs are based on the average rent of a shared apartment.

The health insurance cost applies only if exchange students medical insurance does not count with the required coverage. More information about required coverage can be found at electronic student handbook, which will be send after your admission.
